

## **STATISTICAL ANALYST JOB POSTING**

### **Position Summary:**

The Statistical Analyst assists with the preparation of state rate filings and responding to state insurance department inquiries. This position will complete data calls, participate in research projects and analyze pricing initiatives. The Analyst will model data and use insights to recommend new business strategies and reporting.

### **Principal Duties & Responsibilities:**

- Collaborates with actuarial staff to prepare state rate filings and respond to state insurance department inquiries.
- Support research, analysis, and testing of product changes, roll outs, and channel enhancements, including maintenance of Rate and Rule manuals.
- Query databases to conduct ad-hoc analysis on specified or varied metrics.
- Pull data and analyze metrics regarding Underwriting practices and recommend efficiencies in work processes and vendor/internal tools.
- Analyze and model the current book of business to identify trends and recommend product enhancements. Use data to identify efficient investigation of risk practices.
- Prepare presentations in support of rate changes and other strategic decisions.
- Use knowledge of state regulatory guidelines and constraints to assure product compliance.
- Lead project efforts, collaborating with other departments when needed, to explore business problems, resulting in improvements to underwriting processes and performance results.
- Generate insights that equip decision makers with knowledge to optimize business performance.
- Perform additional duties and/or special projects as required.
- Adhere to Federal and State laws and regulation.
- Any other duties needed to help fulfill the Associations Mission, abide by the Association's Values and fulfill the Association's Strategic Objectives.

### **Knowledge and Skills Requirements:**

- College Degree required. Major in Math, Economics, or Finance preferred
- Actuarial coursework / exam a plus.
- Strong analytical skills and financial acumen
- Ability to manipulate and analyze data, and use reason and logic to draw conclusions
- Experience using SQL, Advanced Excel (V-lookups, Pivot tables, etc.)
- Proficiency in Microsoft Office Suite
- Excellent organization and time management skills

January 2020

- Experience in financial analysis and pricing techniques.
- Excellent verbal and written communication
